

1.THINK

What do you already know about the subject?

2. DISCOVER

Build background knowledge using reference materials.

3.QUESTION

See Developing a Research Question

4. COLLECT

Gather information from a variety of reliable sources: books, databases, journals etc. Go broad and deep.

5. PAUSE

Reflect and synthesize information. Do you need to revise your research question? Continue your research?

6. CREATE

Share your research. What is the significance of your research? Remember to format your paper/citations using MLA or APA formatting.
